SUMMARY

Software Engineer with 5+ years of experience across full stack, mobile, and cloud development. I work across the development lifecycle, translating business needs into production web applications, APIs, and mobile apps, from design to infrastructure and deployment. I bring together UX/UI and software architecture with a focus on performance, accessibility, reusable components, and code review to build scalable, maintainable solutions. Bachelor's degree in Electrical Engineering from UFCG; currently pursuing a postgraduate degree in Software Engineering.

Skills: React, TypeScript, Next.js, Vue.js, Nuxt, React Native, JavaScript, Node.js, NestJS, PHP, Laravel, AWS, Docker, GitHub Actions, CI/CD, Clean Architecture, SOLID, UX/UI (pixel perfect), Scrum / Kanban.
Automated testing: Vitest, Playwright, Cypress.

PROFESSIONAL EXPERIENCE

Coopanest Rio — Software Engineer

Jun 2025 – Present

Remote

- Develop and maintain web platforms and management systems for the healthcare sector using Vue.js, Nuxt, TypeScript, PHP, and Laravel.
- Build and integrate REST APIs for communication between frontend applications, backend services, and internal systems.
- Develop responsive interfaces and user flows with a focus on UX/UI, usability, and accessibility.
- Set up Docker environments and manage AWS infrastructure (EC2, S3, RDS) and MySQL databases, with CI/CD pipelines to automate build and deployment.
- Collaborate directly with stakeholders on requirements gathering, translating operational needs into scalable, sustainable software solutions.

Technologies: Vue.js, Nuxt, TypeScript, PHP, Laravel, MySQL, AWS, EC2, S3, RDS, Docker, CI/CD, REST APIs, Figma, UX/UI.

Auclan Design — Mobile Developer (Freelance)

Dec 2025 – Jun 2026

Remote

- Rebuilt the DentalUni mobile app from scratch using React Native and TypeScript for managing dental services and plans.
- Developed responsive, accessible mobile interfaces driven by user experience using React Native and Expo. Structured state management, API consumption, and form validation with Zustand, TanStack Query, React Hook Form, and Zod.
- Prepared the app for production and took part in build, configuration, and release processes on the Apple App Store and Google Play.
- Helped translate prototypes and product requirements into functional, scalable mobile flows.

Technologies: UX/UI, React Native, Expo, TypeScript, Zustand, TanStack Query, React Hook Form, Zod, REST APIs.

Horus — Software Developer

Feb 2025 – May 2026

Remote

- Developed responsive interfaces for a hospital medical billing platform using React, Next.js, Vue.js, and TypeScript.
- Built RESTful APIs and business logic with PHP and Laravel for system data processing and management.
- Implemented authentication flows, access control, and integration between frontend and backend applications.
- Structured Docker containers (multi-stage builds) and configured CI/CD pipelines with GitHub Actions for deployment on AWS infrastructure (EC2, S3, RDS MySQL) in production.
 - Contributed to UX/UI and architecture decisions, taking part in product development from interface to cloud infrastructure.

Technologies: React, Next.js, Vue.js, TypeScript, PHP, Laravel, REST APIs, Docker, GitHub Actions, CI/CD, AWS, EC2, S3, RDS, MySQL, Figma, UX/UI.

Grupo Neiva — Software Developer

Aug 2023 – Feb 2025

Remote

- Developed landing pages and web applications for the Evoluir EAD, PNLD, and IDUCS products using Vue.js, Nuxt, and TypeScript.
- Implemented new features and performed evolutionary maintenance on the Evoluir System using Vue.js, Nuxt, Laravel, and MySQL.
- Built modular, reusable components, improving interface consistency and code maintainability.
- Developed interfaces focused on UX/UI, accessibility, and usability for different user profiles, including students, teachers, and guardians.
- Took part in code reviews and continuous deployment, also contributing to React Native mobile applications across the group's product ecosystem.

Technologies: Vue.js, Nuxt, React Native, TypeScript, JavaScript, PHP, Laravel, MySQL, Git, REST APIs, Clean Code, UX/UI.

Federal University of Campina Grande – UFCG — Software Developer

Jun 2021 – Oct 2023

Campina Grande, PB, Brazil

- Developed web and mobile applications for laboratory process automation using Next.js, React Native, Node.js, NestJS, and MongoDB.
- Built integration systems between software, microcontrollers, and electronic devices for research and automation projects.
 - Implemented solutions using C, C++, Verilog, and SystemVerilog for digital systems and embedded hardware projects.
 - Developed, as a capstone project, a React Native mobile application integrated with an ESP32 microcontroller to control and automate air-conditioning systems.
 - Took part in research and development projects involving embedded systems, digital logic, and hardware/software integration.

Technologies: Next.js, React Native, Node.js, NestJS, MongoDB, C, C++, Verilog, SystemVerilog, ESP32, Microcontrollers, Embedded systems.

EDUCATION

Bachelor's Degree in Electrical Engineering — UFCG

Jan 2018 – Dec 2024

- Emphasis on software development, electronics, control, and automation.
- Scholarship at LIEC — hardware and software integration projects.
- Scholarship at Trybe — Web Development course (fullstack).

Technical Degree in Systems Analysis and Development — SENAI

Jan 2020 – Dez 2022

- Solid knowledge in data modeling and relational databases.
- Integrative projects with ER model design and migration scripts.

LANGUAGES

Portuguese — Native

English — Intermediate/Advanced

Spanish — Intermediate
